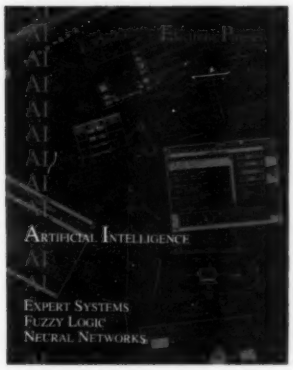
Electronic Progress

Electronic Progress is published by the
Corporate Office of Engineering
of the Raytheon Company

On The Cover

Raytheon's AI efforts have focused on achieving practical utility in various electronic systems within a few years.



Board Of Editors

Publisher
John Blair

Raytheon Research Division

Table of Contents

Introduction	James Mullen *Research Division - Retired*	2
AI and Manufacturing: The Wave Solder Diagnostics and Monitoring System	Robert V.E. Bryant and Nancy Wasiuk *Missile Systems Division*	4
Integration of Expert System Technology within the Process Monitoring and Analysis System	Lawrence J. Stein *Badger Engineers, Inc.*	9
A Knowledge-Based Approach to Missile Engagement Planning	Louis P. DiPalma and Stephen B. Valk *Submarine Signal Division*	13
Engineering Change Tracking Using Expert System	Gaetan Chaput and Ernest Wm. Hiscox *Raytheon Service Company*	18
AI Training Applications	Richard P. Gagan *Missile Systems Division*	22
Equipment Maintenance Applications of AI	Joseph C. Hintz and Nancy W. Wasiuk *Missile Systems Division*	28
Fuzzy Logic for Appliance Control	Joseph R. Adamski *New Products Center*	34
The Raytheon Neural Network Workbench	David J. Hamilton, Courtland R. Chapman, Scott D. Carter *Submarine Signal Division*	39
Target Recognition: Optimal Feature Selection Using Neural Networks	Gretel Anspach and Tom Kostizak *Equipment Division*	45
Identification of Radars Using Neural Networks	Kenneth Pierskalla *Electromagnetic Systems Division*	50
Automated Vision Inspection	Kevin Daly and Dinyar Sepai *Equipment Division*	54
